Summary	Computer Engineering graduate who loves working on embedded projects. Experienced with microcontrollers, Linux, and Python. Adaptable, curious, and always ready to learn. Looking for an embedded software role where I can contribute and have fun doing it.		
Experience	Dyson	First Philippine Industrial Park II	
	Embedded Software Intern	May 2025 - August 2025	
	• Expanded knowledge on Microcontrollers (NXP, STM32, ESP32) • Introduction & Implementation to CI/ CD		
Education	De La Salle University	Undergraduate Studies • CGPA 2.859	
	Computer Engineering	October 2020 to June 2026	
	UST Angelicum College	2011 - 2020	
	Science, Technology, Engineering, and Mathematics (STEM)		
	• Took part in Math and Programming club • Gained hands-on experience in embedded systems by designing and programming sensor-based Lego robots		
Awards	Certificate of Completion: Dyson Internship Programme		August 2025
	Dyson (Global Early Careers)		
	• Awarded Dyson Internship Certificate for completing 480 hours of Embedded Software development		
	4th Place Math Quiz Bee	2017	
	UST Angelicum		
	4th Place Science Quiz Bee	2017	
	UST Angelicum		
Projects	Glove Controllers for 3D Media Creation in VR		2024 - 2026
	• Programmed an asynchronous Python middleware to sync multi-sensor glove data with the Blender API for real-time 3D procedural animation		
	[Dyson] Demo Fan	June 2025 - August 2025	
	• Created a replica of a Dyson fan with NXP boards • Implemented Unit Testing for CI/ CD • LCD Feature Added		
Skills	Programming	Embedded Systems	Project Management
	Machine Learning	CI/ CD	Documentation
